Learn more. We use optional third-party analytics cookies to understand how you use GitHub.com so we can build better products. You can always update your selection by clicking Cookie Preferences at the bottom of the page. For more information, see our Privacy Statement. We use essential cookies to perform essential functions of the site, for example, they are used to log in. Learn more Always active We use analytics cookies to understand how you use our websites so that we can make them better, for example, they are used to collect information about the pages you visit and how many clicks you need to accomplish a task. Learn more pdfHtml is an add iText 7. This add-on will allow you to easily convert HTML into PDF or iText objects. The pdfHtml Community source code is hosted on Github, where you can also download the latest versions. You can also build pdfHtml Community from the source. If you have an idea of how to improve pdfHtml and want to submit code, read our Contribution Guidelines. pdfHtml is doubly licensed as agpl/commercial software. AGPL is an open source/free software license. That doesn't mean the software is free! Purchasing a license is mandatory as soon as you develop business activities by distributing the iText software within your product or deploying it to a network without disclosing the source code of your own applications under the AGPL license. These activities include: offering paid services to customers as an ASP that serves real-time PDFs in the cloud or in a web application by submitting iText with a closed source product Page 2 You cannot currently perform this action.
